DETAILED ACTION

Priority

This application is a DIV of 09/962,487 09/25/2001 which claims benefit for domestic priority under 35 U.S.C. § 119(e) [to a provisional application 60/236,031 09/28/2000], is acknowledged.

Status of Claims

Claims 10-12 are currently pending in the application. Claims 1-9 were canceled through preliminary amendment.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement (IDS), filed on 11/25/2003, which has been entered in the file.

Reasons for allowance

The following is an Examiner's statement of reasons for allowance:

Ushikubo *et al* (US 5,281,745) teach a process for producing nitriles, which comprises subjecting an alkane and ammonia in the gaseous state to catalytic oxidation in the presence of a metal oxide catalyst. The instant process for producing unsaturated nitriles differs from the prior art, which comprises subjecting a mixture of an alkene, an alkane and ammonia to a single-phase vapor phase catalytic oxidation reaction in the presence of mixed metal oxide catalyst having the empirical formula $A_aM_mN_nX_xO_o$. The prior art process neither teaches nor renders obvious the steps of the claimed invention and there is no suggestion or motivation to modify the process of other prior art to obtain the instant process. Therefore the instant claims are allowable over the prior art of record.
